

Previously defined étale morphism
(flat, unramified, locally finite presentation)

étale cover: $\{U_i \rightarrow U\}$ étale, universal epiphism.
 ↳ connects set theoretically on scheme theoretic pts
 ↳ $\coprod U_i \rightarrow U$ faithfully flat

Flat topologies:

fppf : fidellement plat et présentation finie
 "fppf" = faithfully flat and finitely presented
 cats consist of $\{U_i \rightarrow U\}$ each morphism
 is flat & finitely presented
 ↳ uni. epi as above.

X_{fppf}
 X_{fppf}

$\coprod U_i \rightarrow U$
 surj on schms
 faithfully flat.

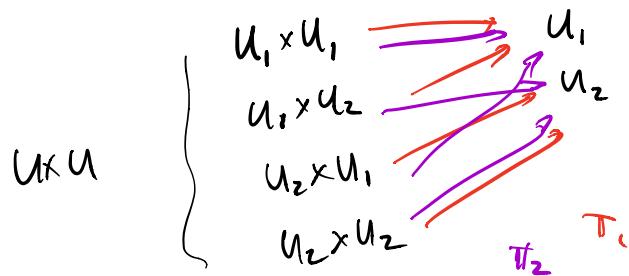

f_{fgc} = Fidèlement plat et quasi-compact

$f f_{\text{fgc}}$ = faithfully flat, quasi-compact

cons $\{U_i \rightarrow U\}$ flat, q.-compact
 (more to this?) cow if surjection pts
 min. epi ...

$$U = \bigsqcup U_i \rightarrow X$$

$$\begin{aligned} U \times_X U &= \bigsqcup U_i \times_X U^{U_i} \\ &= \bigsqcup_{i,j} U_i \times_{U_j} U_j \xrightarrow{\pi_1, \pi_2} \bigsqcup U_i \end{aligned}$$

$$\varphi_{ij}: \mathcal{F}_i|_{U_{ij}} \xrightarrow{\sim} \mathcal{F}_j|_{U_{ij}} \quad \mathcal{F}/U$$

$$\begin{array}{ccc} \mathcal{F}_i|_{U_0} & \xrightarrow{\pi_1^*} & U_{ij} \\ & \searrow & \\ & \mathcal{F}_j|_{U_1} & \end{array}$$

$\varphi_{ij} \leftarrow \varphi: \overline{\pi_1^*\mathcal{F} \rightarrow \pi_2^*\mathcal{F}}$

$$\begin{array}{c}
 \pi_{12}^* \varphi \quad \text{and} \quad \pi_{23}^* \varphi \\
 \downarrow \quad \downarrow \\
 \varphi_{ij} |_{ijk} \quad \varphi_{jk} |_{ijk} \\
 \uparrow \quad \uparrow \\
 \varphi_{ik} |_{ijk} \quad \varphi_{ik} |_{ijk} \\
 \uparrow \quad \uparrow \\
 \varphi_{ik} |_{ijk} \quad \varphi_{ik} |_{ijk} \\
 \end{array}$$

$\varphi_{ij} |_{ijk}$ $\varphi_{jk} |_{ijk}$
 $\varphi_{ik} |_{ijk}$ $\varphi_{ik} |_{ijk}$

$$\pi_{13}^* \varphi = \pi_{23}^* \varphi \cap \pi_{12}^* \varphi$$
